

Grow Healthier, Larger Plants, Fast -- Guaranteed.

Speedy Grow is made with the **world's fastest growing, fresh organic kelp seaweed, Ecklonia maxima**. Its eco-friendly formula is **perfect for both your outdoor and indoor plants**. Use on flowers, ornamentals, non-food bearing trees, shrubs, lawns and indoor plants to make them grow bigger faster. Not intended for use on food crops. Use as part of a balanced plant nutritional program. We're so sure you'll be completely satisfied with Speedy Grow Plant Booster with Organic Kelp, we back it up with a written 100% money-back guarantee.

How does it work?

Auxins are naturally produced in the top growth of plants and travel down to the roots. **Cytokinins** are naturally produced in the roots of plants and travel up to the leaves. These two plant hormones work together triggering either growth of new leaves and shoots, or new roots.

A natural balancing act

If you take a cutting from a plant, and place it in water, the plant tips continue to produce auxins that travel down the plant to the base of the cutting. Since there are no longer roots present, an imbalance between auxins and cytokinins develops. The plant adjusts for the excess auxins by developing new roots. These roots then produce additional cytokinins, which then trigger increased top growth. **Speedy Grow copies nature**, it triggers this same effect by delivering an abundance of auxins to the root system. These auxins then trigger the natural response of increased root production followed by tremendous top growth. The increased root mass produces much healthier plants.

Will it burn my plants?

No, because it's not a fertilizer, it will not burn plants and can actually be used along with both chemical and natural fertilizers.

Contains Organic Ecklonia maxima Kelp

- Good for the earth - Eco-friendly, No nutrient runoff!
- Use anywhere - For both indoor and outdoor plants
- Easy-to-use - Just spray once a week, or more often for even greater results
- Lush healthy plants - Enables better nutrient absorption!
- Fully tested - Member tested and recommended by the National Home Gardening Club!
