

Steps to assemble a grow light

Step 1:

Take out the two hangers from the package, demount the nut and bolt from the hangers.

Step 2:

Take out the ballast (fixture model) from the package and put it on the floor upward.

Step 3:

Slide the two bolts into the middle slot of the ballast, then install hanger to the bolt and fasten it with a nut.

Step 4:

Take a reflector from the package.

Step 5:

Screw the reflector on the socket. A grow light is assembled.

Step 6:

Use the hangers to hang the whole unit on a beam of a greenhouse.
