HYDROCYCLE AQUAPONICS SYSTEMS PRODUCE LUCRATIVE **VEGETABLES AND VALUABLE FISH IN ONE SYSTEM**

Our HydroCycle Aquaponics Systems maximize your business potential by providing the opportunity to tap into two markets, and they allow you to take advantage of the natural biological functions of both fish and plants. As the fish fertilize the system's plants, the plants purify the water, leading to low-maintenance systems that produce natural, pesticide-free products.

The HydroCycle Aquaponics Advantage includes:

Systems that range in size - From two 48' raft beds to four 96' raft beds, including tanks, float beds and hardware.

2,016 lettuce sites to 8,064 lettuce sites.

Systems have annual revenue potential as high as \$398,000.

Produce up to 15,000 lbs. of tilapia yearly.

Features a grow-out system - A fully automated, energy-efficient drum filter that removes solids and saves time and labor.

Systems come with a fingerling system - Includes a bubble washed bead filter for filtration.
