

TERROR-EYES VISUAL BIRD REPELLENT INSTRUCTIONS - DE7035

1. Remove any nests and clean these previously infested areas as much as possible.
2. Do not over-inflate TERROR-EYES visual bird repellent. In fact, slightly under-inflate, about 85%.
3. Locate TERROR-EYES visual bird repellent close to the roosting birds, with good line-of-sight to the infested areas.
4. When installing more than two units, hang them each at a different height (a minimum of one unit diameter apart.)
5. To increase the random motion of TERROR-EYES visual bird scare, use the coil spring provided, and reinforce it with a piece of strong twine slightly longer. This should prevent distorting the spring.
6. When suspending TERROR-EYES bird scare from a rope, it is helpful, especially in windy areas, to anchor the unit to something stable below; use the loop on the bottom of TERROR-EYES .
7. To prevent the birds' becoming used to TERROR-EYES bird scare, occasionally relocate.
8. Punctures may be easily repaired with a vinyl bonding agent.
